

EDUCATION

Degree	Specialization	Institute	Year	Score
B.Tech	Computer Science & Engineering	GITAM University	2021-2025	7.54
Intermediate	Physics, Chemistry, & Mathematics	Aaditya Jr. College	2021	84.8
SSC	-	Alphores High School	2019	9.5

PROJECTS

- **Prediction of Credit Card Approval** *June-Jul 2024*
 - Executed a full data science lifecycle for predicting credit card approvals, from data collection and preprocessing to feature engineering and model development using machine learning techniques.
 - Applied various machine learning algorithms, including Logistic Regression, Random Forests, and Support Vector Machines, to classify and predict credit card approval outcomes, improving decision-making processes for financial institutions.
 - Utilized data preprocessing techniques such as handling missing data, encoding categorical features, and performing feature selection, leading to a cleaner dataset and improved model accuracy.
 - Implemented model evaluation and tuning with metrics like accuracy, precision, recall, and F1 score, optimizing model performance and ensuring balanced predictions for real-world financial applications.
- **Vehicle Pooling System** *Aug.2024 - Mar 2025*
 - Designed a ride-sharing platform using Google Sites, Google Forms API, and Google Maps integration to connect 500+ staff and students for pooling at GITAM Visakhapatnam campus
 - Implemented a rule-based ride coordination workflow by organizing user responses based on location and travel schedules.
 - Reduced campus traffic congestion and carbon emissions by facilitating eco-friendly transport through an accessible web interface

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript
- **Web Development:** HTML, CSS, Bootstrap
- **Databases:** SQL
- **Tools:** Git, GitHub, VS Code
- **Languages Known:** English, Telugu, Hindi

POSITIONS OF RESPONSIBILITY

- **Meta Developers Circle [AR/VR Domain]** *Jul-Dec 2023*
 - Authored an article on "AR & VR in the Manufacturing Sector" for the MDC Club, contributing to industry insights and emerging technology discussions.

PROJECT-BASED TRAINING EXPERIENCE

- Completed project-based machine learning training at DhyanaHitha Organisation, developing a Credit Card Approval Prediction model using Python and applying data preprocessing, feature engineering, and model evaluation techniques.
- Completed project-based web development training at CodSoft, where I independently built assigned web projects using HTML, CSS, and Bootstrap as part of structured learning.
